

BRIGHT IDEAS IN THE KITCHEN

Granchio is an offspring of Italian creativity enhanced by innovative technologies.

The brand's history began with several lines of kitchen appliances. Granchio cookware possesses hot Italian temper: elegant and fascinating, beautiful and stylish Granchio is a modern concept of colorful cookware with decor introducing bright emotions and impressions into your everyday life.

Developing speedy, Granchio Company expands constantly the range of its products, and today it has already gone out of kitchen area. Nowadays, Granchio offers you not only kitchenware but also wide range of household goods helping to keep your house in order and clean. Granchio is an embodiment of advanced manufacturing sciences and design technologies, which make your life easier. Henceforth kitchenware and household goods are not soulless tools in your hands any more. They get co-authors of your bright culinary ideas, as well as give an individual style, vivid and modern look to your kitchen.

"Bright Ideas Contest Awards" – BICA, initiated by Granchio is carried out between designers every two years aiming to originate creative and innovative decisions delighting your eye in the kitchen. Hundreds of the best creative designers are fighting for chance to externalize their spirited ideas in Granchio's shapes and colors, and to help it stay for you an ever-living source of culinary inspiration.

Each product undergoes quality control for accordance to European standard ISO 9001: 2000; it obtains "quality symbol" – "Testato da Granchio". Therefore having noticed this sign on the package you may rest assured that you've purchased the high-quality product completely safe for your health.

Our technology research and design (R&D) team brings together creativity, technology skills and experience to shape the cookware of tomorrow by anticipating trends and developing new production and design solutions. The researchers are continuously developing new technologies for designers to bring them to life.

Marmo Induction

collection

This marvelous collection of cookware with marble coating by Granchio will be appreciated in full by the owners of ultra-modern induction cookers. Marmo Induction – is the world best cookware for the world best ovens!

Idee vive in cucina

Marmo Induction

collection

- High-quality die cast aluminium – excellent thermal conductivity and resistance to deformation
- Superior multilayer non-stick Marble coating by Granchio, resistant to metal kitchen utensils use, safe for health
- Exterior non-stick coating for easy cleaning
- Induction disk protects the bottom of cookware against any deformation and enables using on induction ovens
- Ergonomically designed stay-cool bakelite handles for comfortable grip

FEATURES OF MARMO INDUCTION COLLECTION

DIE CAST ALUMINIUM

High-pressure die casting is a process for producing aluminum die cast kitchenware by forcing molten aluminum alloy under substantial pressure into reusable steel molds. Because die castings do not consist of separate parts welded or fastened together, the strength is that of the alloy rather than the joining process. Rapid injection and rapid solidification under pressure combine to produce a dense, fine-grain surface structure, which results in high thermal conductivity, excellent wear, anticorrosion and deformation-proof properties as well as strength at high temperatures.

MARBLE COATING BY GRANCHIO

Superior multilayer non-stick coating Marble by Granchio, reinforced with marble particles, possesses excellent non-stick properties; it is highly resistant to metal kitchen utensils use, very easy to clean and safe for your health.

PFOA-FREE

Coating by Granchio is manufactured without potentially dangerous PFOA, offers advanced non-stick properties and is absolutely safe both for your health and for the environment.

INDUCTION DISK, RESISTANT TO DEFORMATION

Thanks to induction disk the cookware from Marmo Induction collection by Granchio can be used on all kinds of cooktops including induction. The disk optimizes heat distribution and improves resistance of bottom to any deformation.

STAY-COOL BAKELITE HANDLES

Ergonomically designed stay-cool bakelite handles make the kitchenware even more convenient, safe and simple to use. Bakelite is a heatproof material with temperature resistance up to 180°C that, however, should not be used in the ovens.

FEATURES OF ECOPAN COLLECTION

CERAMIC COATING BY GRANCHIO

This non-stick ceramic coating is made of natural a raw material which doesn't contain any heavy metals or volatile organic compounds and approved to be the safest for health. It contains NO Polytetrafluoroethylene (PTFE) and is applied in an environmentally friendly way, as well without using Perfluorooctanoic acid (PFOA). It has excellent non-stick and antibacterial features. It cannot be burned out or exfoliated even under the temperature of over 450°C. Pollutants hardly stick on coating surface that prevents propagation of bacteria and considerably simplifies its cleaning.

PTFE-FREE

Natural ceramic coating by Granchio is completely PTFE-free and applied in an ecological manner, resulting in 60 % less CO² emissions. No release of toxic fumes or other potentially dangerous chemical compounds even while overheating the cookware above 260°C, absolutely safe both for your health and for the environment.

PFOA-FREE

Coating by Granchio is manufactured without potentially dangerous PFOA, offers advanced non-stick features and is absolutely safe both for your health and for the environment.

INDUCTION DISK, RESISTANT TO DEFORMATION

Thanks to induction disk the cookware from Ecopan collection by Granchio can be used on all kinds of stoves including induction. The disk optimizes heat distribution and strengthens firmness of a bottom to any deformation.

STAY-COOL BAKELITE HANDLES

Ergonomically designed stay-cool bakelite handles make the kitchenware even more convenient, safe and simple to use. Bakelite is a heatproof material with temperature resistance up to 180°C, however, should not be used in the ovens.

FEATURES OF GRILL COLLECTION

DIE CAST ALUMINIUM

High-pressure die casting is a process for producing aluminum die cast kitchenware by forcing molten aluminum alloy under substantial pressure into reusable steel molds. Because die castings do not consist of separate parts welded or fastened together, the strength is that of the alloy rather than the joining process. Rapid injection and rapid solidification under pressure combine to produce a dense, fine-grain surface structure, which results in high thermal conductivity, excellent wear, anticorrosion and deformation-proof properties as well as strength at high temperatures.

SWISS ILAG® DURIT SELECT COATING

Slightly ceramic reinforced multilayer non-stick ILAG® Durit Select coating is resistant to metal kitchen utensils use, PFOA-free and safe for health. High-temperature strength of Durit Select turns it to a perfect grill pans coating. The striking high endurance strength and very good non-stick characteristics satisfy even the most demanding of consumers.

PFOA-FREE

Coating ILAG® Durit Select is manufactured without potentially dangerous PFOA, offers advanced non-stick properties and is absolutely safe both for your health and for the environment.

FOLDABLE HANDLE

The handle can be easily folded for convenient and space-saving storage.

DETACHABLE HANDLE

The handle can be easily removed for using your grill pan in the oven.

DOUBLE-SIDED GRILL PAN

Quick and convenient cooking of any food and both sides - just turn over the pan closed.

Air Pressure Lock technology for preparation of healthy, juicy and delicious food - upper pan fits tightly to the lower pan; excess steam releases through a little outlet, pressure and temperature are rising inside and your food is cooking in its own juice and much faster, preserving its color, smell and nutrients.

Silicone Gasket ensures minimal heat loss and prevents leak while turning the pan.

One-touch magnetic handle lock for pressure build-up, easy opening and closing of the pan.

Radiant Heat Circulation technology for perfect heat retention and distribution.

Specially designed Oil Dropping Tray collects greasy oil or water from the upper pan - no more greasy stains on your stove.

Green Fiamma

collection

Terra

Tajine is a famous Moroccan thick-walled ceramic cookware, ideal for cooking meat with vegetables on a slow fire. The main secret that reveals a magnificent taste of the dishes prepared in Tajine resides in its lid. A high massive cone of the lid fits tightly to the rim of the bowl and thereby keeps hot steam inside of the pot. Your dishes stew slowly in their own juice preserving all nutrients and assuming a taste inimitable in its tenderness. Only Tajine enables to prepare a truly succulent meat, saturated with palatable juice of vegetables and flavoring herbs. Moreover, this cookware is unbelievably simple and easy to use and to clean. Tajine from Orientale collection by Granchio knows all about your favorite dishes!

FEATURES OF GREEN FIAMMA COLLECTION

ECO-FRIENDLY NATURAL CLAY

Ceramic cookware of Green Fiamma collection is shaped of natural eco-friendly clay, which supplies even and constant heat for better retention of flavours and nutrients. This material is non-reactive, non-toxic and absolutely safe for your health.

HIGHLY STRONG GLAZE

Cookware Green Fiamma is covered with a highly strong and resistant to chipping glaze, which does not scratch or craze. It is so hard that you can cut the dish inside using your metal kitchen utensils without harming the surface of the cookware. Moreover, it is very easy to clean and dishwasher safe.

VERSATILE USE

Green Fiamma is a cookware of versatile use. It is fireproof, resistant to thermal shocks and suitable for use in freezers, microwave ovens and all kinds of hobs excluding induction. It means that your pot can go from a freezer or a refrigerator directly to a hot oven, and then to your table, where it will go on with keeping food warm while serving. Modern and functional design of cookware Green Fiamma will make any kitchen warm and cozy.

TAJINE LID

The most significant feature of Tajine is its high massive conical lid. During cooking hot steam rises along the inner walls of cone and, cooling, condenses on them into liquid, and then flows down to the Tajine bowl. This peculiarity makes Tajine ideal for preparation of tender and spicy meat with stewing vegetables.

FEATURES OF SILICOFLEX COLLECTION

FOOD-GRADE SILICONE

Granchio uses only 100% food-grade silicone, which is absolutely safe for your health, as it does not contain any toxic or aggressive compounds. This material is environmentally friendly and ideal for the preparation of any recipe, whether sweet or savoury.

TEMPERATURE RESISTANCE

Silicone used for manufacturing Silicoflex products is capable of resisting temperatures from -40°C and up to +250°C. Its thermal conduction guarantees the best results both for freezing and baking. Moreover, it is odourless and taste free.

NON-STICK PROPERTIES

Because of non-stick nature and flexible shape, silicone bakeware from SilicoFlex collection allows of an easy, speedy and perfect process when demolding. You don't need to oil your pan before baking, your bakes will never be burnt.

EASY CLEANING AND SPACE-SAVING STORAGE

Thanks to lightness, thinness and flexibility of silicone, products from collection SilicoFlex are very easy to clean and to store. They cool very quickly, are absolutely dishwasher safe and can be easily rolled for space-saving storage.

FEATURES OF BOLLITORE COLLECTION

CARBON STEEL – LIGHT & STRONG

Water kettles from Bollitore collection are made of high-quality carbon steel material, combining lightness and impressive strength.

DURABLE ENAMEL-ON-STEEL COATING

Enameled water kettles have an undeniable advantage: smooth, easy-to-clean surface, which does not absorb smells and does prevent the propagation of bacteria.

WHISTLE

A whistle alerts you when water is ready.

ONE-TOUCH OPENING MECHANISM

One-touch opening mechanism of Bollitore water kettles allows you to open or to close the kettle's spout just with one touch.

STAY-COOL BAKELITE HANDLE

Ergonomically designed stay-cool bakelite handle makes the kettle even more convenient, safe and simple to use. Bakelite is a heatproof material with temperature resistance up to 180°C that, however, should not be used in the ovens.

INDUCTION

Enameled water kettles Bollitore made of carbon steel can be used on all kinds of hobs including induction.

FEATURES OF COLTELLO COLLECTION

SHARP HIGH-CARBON STEEL EDGE AND ERGONOMICALLY DESIGNED NON-SLIP HANDLE

Knives by Granchio have special high-carbon steel blade that allows faster cutting products and optimizes the process of cooking your favorite meals. All knives are also equipped with ergonomic non-slip handle, made of special heat-resistant material that prevents slipping a knife and greatly improves its usability.

NON-STICK AND ANTIBACTERIAL COATING

Superior non-stick coating ensures sharpness and easy cutting products even at high temperatures. These knives are suitable for frequent use, easy to wash and reflect odors. Antibacterial coating protects products from fungus, mold and odors, reflecting them from the surface of the blade.

WIDE CHOICE OF COLORS

Collection of knives is represented in almost all rainbow colors. Therefore, bright knives by Granchio will not only decorate your kitchen, but also elate you! Besides, Granchio knives do not require special care and are dishwasher safe.

FEATURES OF PESTO COLLECTION

NATURAL SOLID MARBLE

The mortars and pestles are made out of durable solid natural marble.

CARE OF TASTE AND FLAVOR

Marble mortar Pesto releases genuine flavor of herbs and spices: because of the minimal friction, aromas don't burn off in the grinding, like they do with a food processor or electric grinder. Marble mortars are great for making seasoning pastes and spice mixtures.

UNPOLISHED INNER SURFACE FOR EFFICIENT GRINDING

Hard unpolished inner side of the bowl promotes efficient powdering and grinding.

SAFE AND COMFORTABLE USE

Because of the heavy weight and non-slip bottom of the mortar, it stands firmly on the table, what ensures its safe and comfortable use.

FEATURES OF MAGIC MOP COLLECTION

Ideal for various hard surfaces: laminate, tile, wood, etc.

Cleans corners

Cleans around and beneath furnishing and fixtures

Cleans narrow spaces

Cleans glass windows, walls etc.

Car wash and polish

ROTATING 360°

Removable microfiber mop head rotates 360°, effectively absorbs water, and captures dust and dirt without scratching the surface.

MAGIC MOP CLEANING SYSTEM

Environmentally friendly and energy-saving spinning mechanism. To wring out or dry the mop quickly, just put it flat in the basket and press the pedal.

AN INNOVATIVE MANNER OF ATTACHMENT

Thanks to an innovative manner of attachment, a dirty fabric disc can be easily replaced without touching it with hands.
